

State-of-the-Art Stations for Quality Grossing

Sakura offers a complete line of products for sample preparation and anatomical grossing. Accu-Edge® Grossing Stations offer the opportunity to customize a grossing station to fit a lab's specific needs. Sakura's grossing stations are built from surgical grade stainless steel and promote standardized performance while enhancing grossing capabilities. Choose from an Elevating Grossing Station with or without hands-free controls, a space saving Countertop Station, or an economical Pathology Workstation.

Accu-Edge grossing tools, such as the scalpel and trimming blades, provide unsurpassed blade-edge sharpness for maximum cutting efficiency. The Accu-Edge grossing boards and wells, with depth adjusters and guide guards for knife positioning, make obtaining a suitable tissue section much easier. The Accu-Edge Grossing Forks feature two sets of tines separated by a space of 1.5mm, 2.0mm, or 2.5mm for precise grossing of more difficult or soft tissue. Forks are ideal for smaller specimens and specimens with a wall or an edge such as gall bladder, ovary, and tubes.

Sakura's Accu-Edge line of grossing stations and grossing tools offer flexibility with the power to customize.

Accu-Edge® Grossing Tools

Accu-Edge® grossing tools include specially designed grossing boards available in three sizes—standard, large, and wells—to accommodate a wide range of tissue types. Featuring two adjustable wells that ensure grossing to an exact thickness, these boards enable complete standardization of the grossing process.

In addition, Accu-Edge trimming knives and scalpel blades provide the sharp cuts necessary for exact grossing techniques. Tissue tamps allow a firm hold on specimens while making horizontal cuts.

The Accu-Edge product line includes three grossing forks designed to hold specimens including skin, arterial, or colon samples, and any specimens with layers, while maintaining perfect specimen form and integrity.

Superior Stations give you Superior Choices

 **Tissue-Tek® Accu-Edge®**
Grossing Station

Accu-Edge® Elevating Grossing Station #0105

As the top-of-line, the Accu-Edge® Elevating Grossing Station has been designed to fit into most lab configurations while accommodating the height of all lab personnel. Standard features include:

- 1/2 HP disposal
- Two ventilation options
- Sink with mixing faucet
- Easily accessible control panel
- Ample lighting
- Formalin container with spigot
- Magnetic instrument holder
- C-fold paper towel holder
- Polyethylene dissecting board
- Vacuum breaker protected water supply
- Dissecting area rinse
- Spray hose assembly

Accu-Edge® Countertop Grossing Station #0110

Featuring enhanced grossing capabilities for limited spaces, the Accu-Edge® Countertop Grossing Station is perfect for smaller labs because it is built to sit on any countertop. Standard features include:

- Two ventilation options
- Sink with mixing faucet
- Easily accessible control panel
- Ample lighting
- Formalin container with spigot
- Magnetic instrument holder
- C-fold paper towel holder
- Polyethylene dissecting board
- Vacuum breaker protected water supply

Accu-Edge® Pathology Workstation #0115

A customizable, affordable workstation for your lab. The Accu-Edge Pathology Workstation offers a comprehensive suite of standard and optional features. Standard features include:

- Two ventilation options
- Large sink with mixing faucet
- Easily accessible control panel
- Ample lighting
- Formalin container with spigot
- Magnetic instrument holder
- C-fold paper towel holder
- Polyethylene dissecting board
- Vacuum breaker protected water supply
